

How To Change Your Password on NPC Student Email

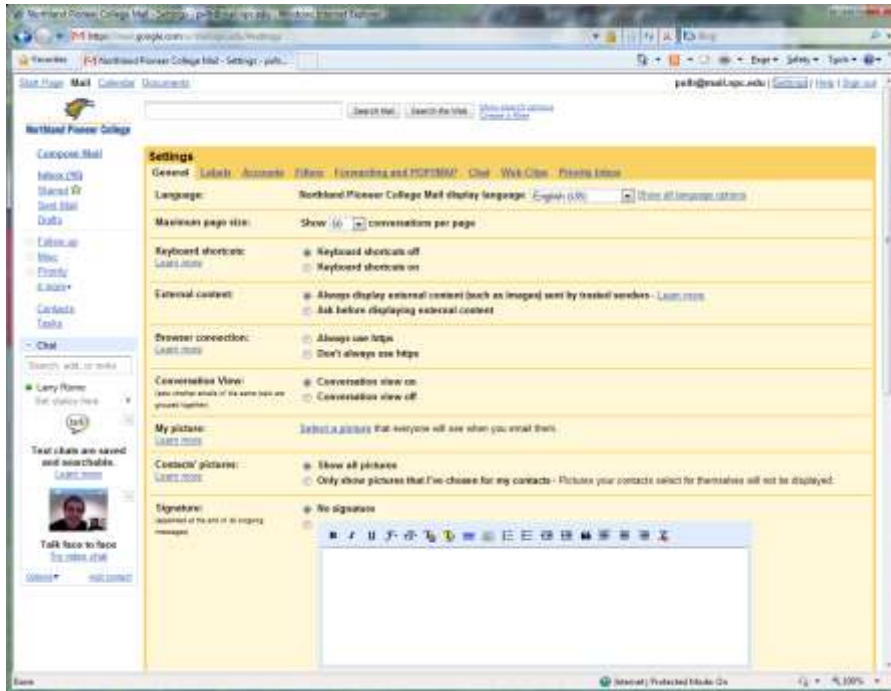

Go to <http://web.mail.npc.edu> and login at the login screen

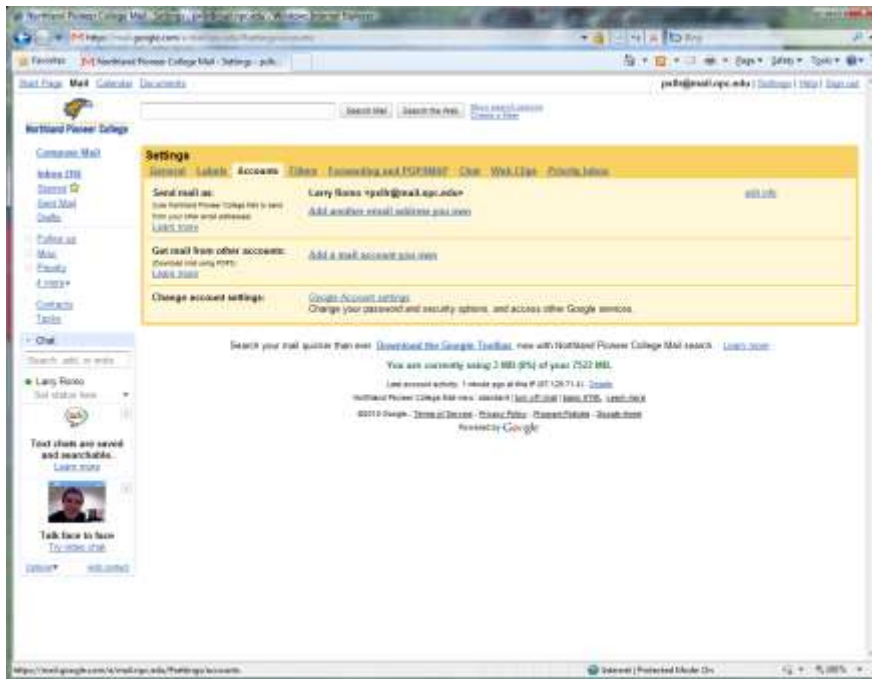

That opens up your student email. Click the Settings link in the upper right corner just after your email address.

Click the Accounts tab on the Settings page

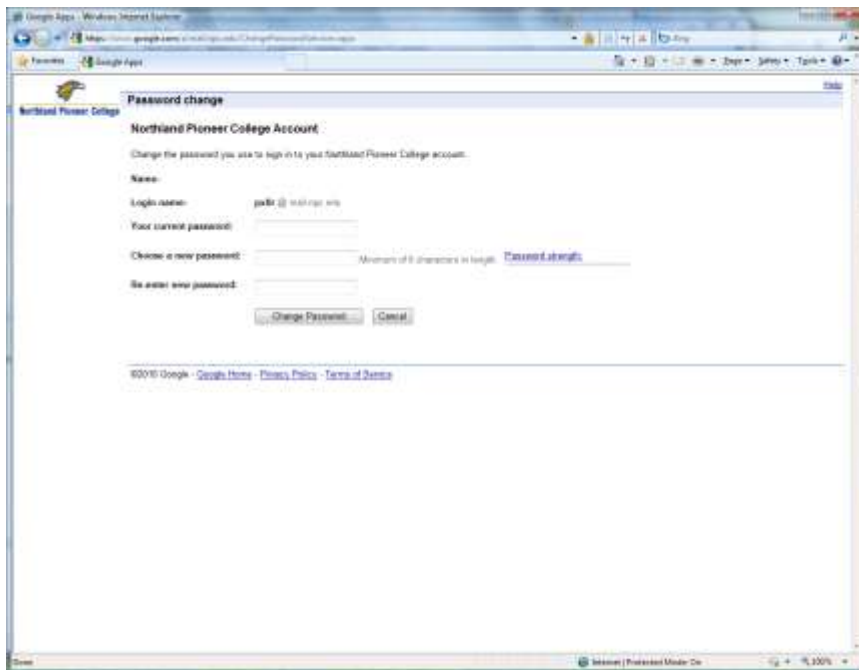

Click the Google Account Settings under the Accounts Tab

Click Change Password on the Personal Settings page.

Change your password, enter the old password in the top box and then the new one in the second box, and then the new one again in the third box. Then Click the Change Password button.

Your password has been changed in NPC's Student Email powered by Google. This does not change your password anywhere else on any other NPC services at this time. So if you wish to have the same password on other services, you must change your password separately on those services.
